

Every Patient Has an Experience

SURFACES FOR HEALTHCARE

Wilsonart® Healthcare

Improve the Experience with Wilsonart®

At Wilsonart, we know the mission of every healthcare organization is to provide patient care that's effective, medically relevant, and operationally efficient; all in a comfortable, convenient environment, where the patient-provider relationship is at the center.

This relationship is influenced by many factors that go well beyond the clinical aspects of the patient visit. The aesthetics of a waiting area, the quality of the surfaces, and the feel of a space can impact the development of trust required to deliver outstanding medical care.

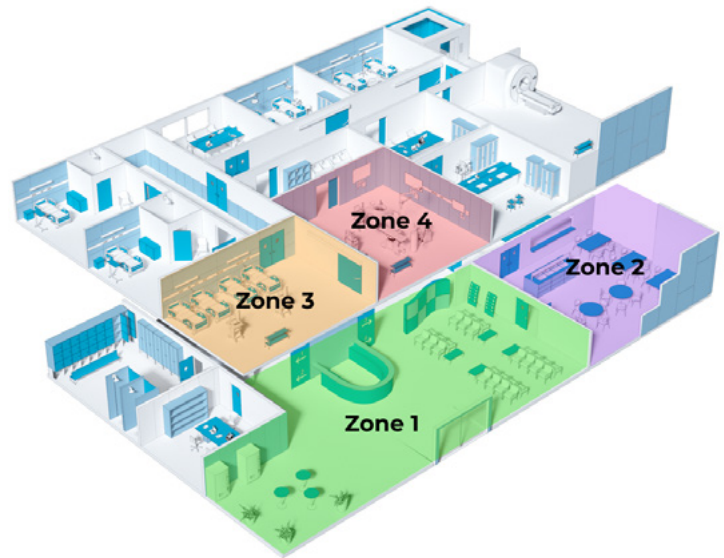

Materializing a modern built environment means utilizing the right environmental surfaces centered on evidence-based design solutions — creating a canvas for everyone, in every space, to have an exceptional experience. When designing against the risk of infectious agents and Healthcare-Associated Infections (HAIs), identifying and implementing the right surface solutions is paramount for safety, efficiency, and patient comfort.

With multiple product choices available, Wilsonart developed Disinfection Zones as a simplified material choice guide for addressing essential Cleanability, Disinfection, and Durability requirements.

Disinfection Zones

Wilsonart Disinfection Zones is an easy-to-follow guideline for selecting the right surfaces within four primary healthcare areas prone to infectious risk. Each Disinfection Zone, from Low Risk to Very High Risk, addresses the specific cleanability, disinfection, and durability requirements for creating high-functioning spaces. These long-lasting spaces can measure up to stringent cleaning, sanitizing, disinfecting, and sterilizing protocols.

1 ZONE 1
PUBLIC SPACES:
LOW RISK

2 ZONE 2
STAFF SPACES:
MEDIUM RISK

3 ZONE 3
PATIENT SPACES:
HIGH RISK

4 ZONE 4
PROCEDURE SPACES:
VERY HIGH RISK

DISINFECTION ZONE 1

Public Spaces

Provide a warm welcome to patients and families and send the message they're in a high-quality environment. Our surfaces help facilitate a positive experience from the very beginning.

High Pressure Laminate (HPL)

Made for outstanding durability. With our depth and breadth of options, you can create an ideal reception area.

Quartz (QTZ)

This material thrives in high-touch applications and sends a strong message about a facility's dedication to quality care.

Compact Laminate (SPC)

Take a preventative approach. With Compact Laminate, you can protect surfaces from impact common to healthcare settings.

Thermally Fused Laminate (TFL)

For low-touch surfaces, our TFL coordinates beautifully and makes the most of design budgets.

DAILY CLEANING WITH HOUSEHOLD OR COMMERCIAL CLEANERS.

Public spaces are generally considered Low Risk Areas. In times of heightened awareness, they can sometimes be considered Medium Risk Areas. They can include hospital lobbies, health retail waiting areas, and urgent care waiting rooms. From non-porous surfaces like Wilsonart® Solid Surface and Quartz to moisture-resistant High Pressure Laminate with built-in Antimicrobial Protection utilizing silver ion technology, many of our wear-resistant surfaces are appropriate for use in these areas.

A Healthy First Impression

Elevator

Make elevator interiors beautiful and durable with Compact Laminate, made to withstand impact from guests, wheelchairs, and medical equipment.

Waiting Room

A dedication to outstanding care can be communicated with High Pressure Laminate. It's durable, beautiful, moisture-resistant, and with AEON™ Enhanced Scratch and Scuff-Resistant Performance Technology, it performs better, longer.

VERSUS COMPETITIVE LAMINATES WITH SIMILAR FINISHES

Cafeteria

Feast your eyes on a combination of Solid Surface and High Pressure Laminate, including designs from our Virtual Design Library. Our Solid Surface is durable, non-porous, and NSF compliant, making it ideal for food service areas.

Hallway

With High Pressure Laminate on the doors and Compact Laminate on the walls, hallways provide end-to-end durability, design, and safety.

Lobby

A bright, new lobby can make a statement that not only wows patients and staff, but it can also reflect state-of-the-art quality care. Utilize best-matched Coordinated Surfaces by transitioning from High Pressure Laminate to Thermally Fused Laminate as you go from high-touch to low-touch areas.

DISINFECTION ZONE 2

Staff Spaces

Empower caregivers while they foster a human connection with patients and their loved ones. A mix of functional surfaces supports every staff member, every shift.

Solid Surface (SS)

A non-porous surface that's easy to maintain and disinfect. Virtually seamless and colorthrough, our Solid Surface excels in high-touch settings.

High Pressure Laminate (HPL)

Durable, beautiful, and moisture-resistant. Ideal for high-touch areas, including reception areas. Specified with AEON™ Scratch and Scuff-Resistant Performance Technology, this surface performs better, longer.

Thermally Fused Laminate (TFL)

Available in over 230 designs and numerous finishes. Strategically coordinated with our High Pressure Laminate, this cost-effective solution excels in vertical, low-touch applications.

Wilsonart By You (WXY)

Add a “wow” factor to public-facing applications. For logos, artwork, and well-positioned wayfinding elements, our laminates can be completely customized.

CLEANING AND DISINFECTING MULTIPLE TIMES PER DAY WITH HOUSEHOLD OR COMMERCIAL CLEANERS.

Staff spaces are considered Medium Risk Areas. They can include break rooms, locker rooms, storage rooms, and workspaces. Surfaces with enhanced protection and durability — such as High Pressure Laminate with AEON™ Enhanced Scratch & Scuff-Resistant Performance Technology and Antimicrobial Protection, and non-porous and repairable Solid Surface — are ideal for these spaces.

Where Surfaces Support a Positive Outcome

PHANTOM ECRU 8212K-28 HPL
FLORENCE WALNUT 7993-38 HPL

Lockers

Our Compact Laminate ensures staff lockers withstand high-traffic impact, intensive disinfection protocols, and add durability to the aesthetic of your design.

Break Room

By blending High Pressure Laminate and Solid Surface, staff can enjoy a break room that's design-forward, relaxing, and easy to maintain. Adding surfaces that are NSF compliant supports the broad range of activities common to modern healthcare break areas.

LIGHT OAK PLY 8202K-28 HPL
QUARRY MELANGE 9041ML SS

FLAX LINEN 4990-38 HPL
MORELIA MANGO 7985-38 HPL

Healthcare Workplace

A functional environment for sharing resources and performing administrative duties. Our High Pressure Laminate promotes sophistication, durability, and comfort. Traceless™ Laminate adds a unique, soft-to-the-touch surface that conceals smears, smudges, and streaks.

Lab

Ideal for laboratory use, Durcon® Epoxy worksurfaces are durable, chemical- and heat-resistant, Class A fire-rated, monolithic, and non-absorbent. Available from Durcon® A Wilsonart Company. Learn more at Durcon.com.

BLACK ONYX DURCON® EPOXY

DISINFECTION ZONE 3

Patient Spaces

Support patients, staff, and loved ones in a holistic manner. Our surfaces meet the functional demands of the space, while promoting rest and recovery.

Solid Surface (SS)

A non-porous surface that's easy to clean and disinfect. Our Solid Surface is an excellent solution in high-touch areas where infection control is critical.

High Pressure Laminate (HPL)

Create a calming, home-like environment with over 600 designs and 17 finishes. High Pressure Laminate works around the clock to support a positive patient experience.

Coordinated Surfaces (CS)

Why settle for close enough? We provide an easy-to-spec combination of High Pressure Laminate, Thermally Fused Laminate Panels, Cabinet Doors, and Edgeband, perfect for coordinating storage cabinets, work surfaces, and more.

Wilsonart By You (WXY)

Enhance a room's identity and mood with entirely custom laminates, created with camera-ready artwork, photos, or illustrations.

CLEANING AND DISINFECTING SEVERAL TIMES PER DAY AND EVEN MORE FREQUENTLY FOR HIGH-TOUCH AREAS USING COMMERCIAL CLEANERS.

Patient spaces are considered High Risk Areas. They can include exam rooms, imaging rooms, and infusion rooms. Smooth, virtually seamless surfaces such as thermoformable Wilsonart® Solid Surface or high-impact Compact® Laminate can prepare finished spaces to withstand the ongoing rigors of this built environment.

Disinfection. Durability. Design. Down to a science.

Exam Room

A strategic blend of Solid Surface and High Pressure Laminate supports functionality, maintenance, and long-lasting performance. For patient-provider communication, our Markerboard Laminate writing surface perfectly complements the space.

Imaging Room

Mixing materials like Compact Laminate and High Pressure Laminate creates technical workspaces with a balance of durability and professional sophistication.

Infusion Area

This area's critical elements require a combination of surfaces that can handle harsh disinfection protocols and foster a calming experience.

DISINFECTION ZONE 4

Procedure Spaces

Life-altering procedures require the best of care. Care that is safe and reliable, much like your surfaces should be. Surfaces should long-support and enable more positive outcomes.

Solid Surface (SS)

Non-porous, virtually seamless, and easy-to-clean and maintain, Solid Surface is ideal for high-risk procedure spaces that must continuously combat the threat of infection.

High Pressure Laminate (HPL)

In all types of procedure spaces, High Pressure Laminate is prepared to handle anything. Armed with AEON® Scratch & Scuff-Resistant Performance Technology, HPL can impressively withstand excessive wear induced over time.

CONSTANT CLEANING, DISINFECTING, AND STERILIZING SEVERAL TIMES PER DAY WITH COMMERCIAL CLEANERS AND PROTOCOLS.

Procedure spaces and surgical suites are considered Very High Risk Areas. In addition to procedure spaces, these areas can also include neonatal intensive care units and operating rooms. Non-porous, virtually seamless surfaces like Solid Surface can be used on walls or horizontal surfaces for maintaining a high level of care and added protection. High Pressure Laminate with built-in Antimicrobial Protection may also be used on vertical surfaces such as casework doors.

TUSCAN WALNUT 7921-38 HPL

Protecting people through every stage of life.

Surgical Space

High-risk surgical settings require uncompromising dependability. High Pressure Laminate with AEON™ Enhanced Scratch & Scuff-Resistant Performance Technology paired with Antimicrobial Protection can help protect against infectious threats.

Oncology Room

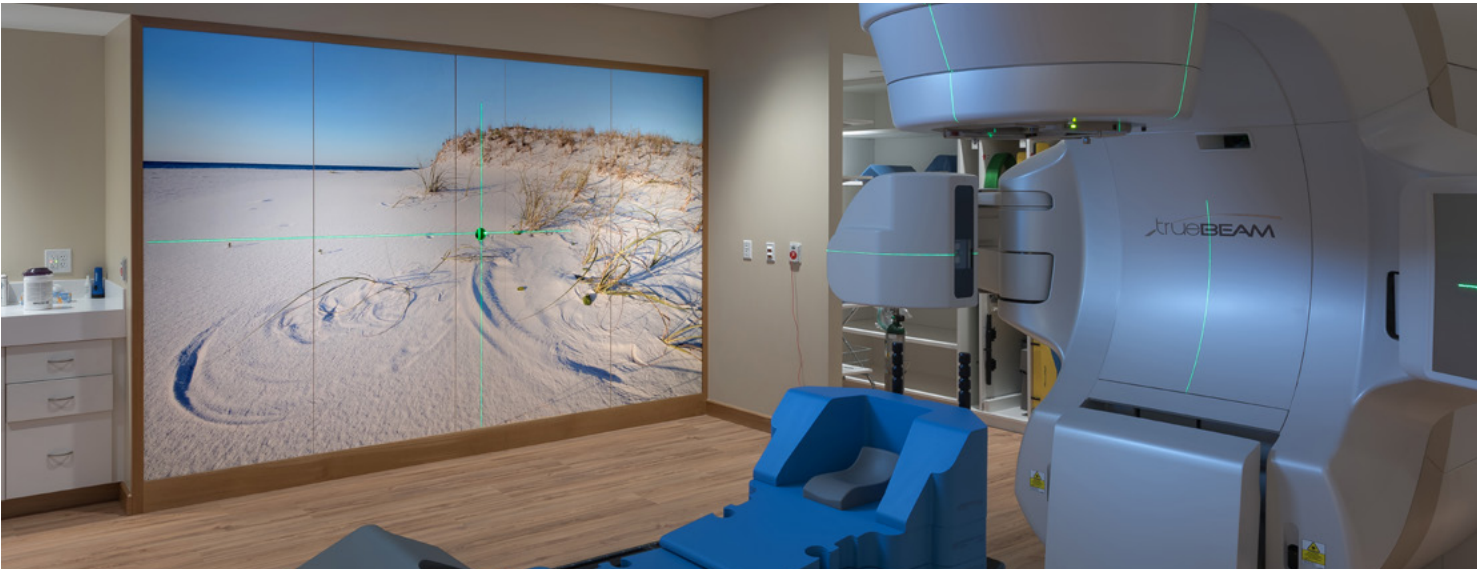

In spaces where anxiety levels can skyrocket, adding calming visual scenes with custom Wilsonart® Digital Print Laminate can help ease tensions.

Hematology Space

Safety is a primary concern for blood donors and recipients. Surfaces like Wilsonart® Solid Surface are reliably durable, can help defend against damaging microbes, and last long in high-traffic areas.
